BHH Services

Comprehensive Care Management— Discuss adding or verify that substance abuse prevention is an active treatment plan goal. Coordinate with PCP and supportive services to assess if there are and additional health or treatments needs.

Care Coordination— Assist client with scheduling appointments to control alcohol and drug intake. Assist with follow-up appointments as needed.

Health Promotion— Review the importance of driving sober and the negative side effects for the clients overall health and wellbeing.

Comprehensive Transitional Care— Work with client and hospital staff to make sure any prescriptions given meet the clients sobriety goals. Coordinate any outpatient or other follow up appointments needed post discharge.

Patient and Family Support— Educate client and family members with understanding the risks and consequences of impaired driving.

Referral to Community Support Services— Link client to local AA/NA groups. Support client with finding additional substance abuse groups that fit their individual needs.
